

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

September 24th.

Vice-President BRIDGES in the Chair.

Twenty-seven members present.

On report of the respective Committees, the following papers were ordered to be published in the Proceedings.

On the genus *PODOTHECUS*.

BY THEODORE GILL.

In the Proceedings of the Academy of Natural Sciences for April, 1861, a very characteristic type of the family of *Agonoids*, recently discovered by Dr. Kennerly, the Naturalist of the North-western Boundary Survey, has been noticed. The following full and detailed description of the species is now submitted. The analytical table of the family will exhibit the relations of the genus to the other members of that group.
